

# IETDS for Danish Defence

A CORENA PRESS RELEASE

## FOR IMMEDIATE RELEASE

Copenhagen, Denmark – 12 April 2007

CORENA announce today that they have signed a large contract with the Danish Defence for the delivery of their new Interactive Electronic Technical Documentation System - IETDS.

Danish Defence's IETDS system will be used for up to 3000 users, and will hold all technical documentation for all material systems for all services, in domestic as well as in international operations.

The system will be based on CORENA's world-class products Life\*S1000D and Life\*WEB, and will include full support for the governing military standard S1000D as well as other traditional formats for technical publications. The system will integrate with Danish Defence' SAP based DeMARS system and will ensure full accessibility from, and interoperability with, important logistic disciplines related to maintenance and operation.

*"We are very pleased to add Danish Defence to our fast growing number of defence customers. Our defence products have evolved into comprehensive state-of-the-art solutions supporting the defence logistics organisation' in processes related to acquisition, maintenance and operation of defence material. The Danish Defence's modern and future oriented solution approach, including it's focus on the S1000D standard, makes this contract a significant contributor towards a unified solution for defence logistics organisations, where integration of technical documentation with ERP systems has become a firm requirement", says Toralf Johannessen, Vice President CORENA Defence Division.*

*"This contract is a result of a thorough specification followed by a public tender process. We have been searching the market in order to find the best solution and the most competent vendor. We are confident that our collaboration with CORENA will expand our scope in obtaining effective streamlined and standardised solutions", says Jens Birch, Chief of Danish Defence IT Agency.*

...CONTINUED FROM LAST PAGE

*“The standardisation on S1000D and the selection of an experienced vendor, who truly understands our business, will in the long run increase system operational readiness and reduce costs associated with maintaining and providing accurate information for our material system in domestic and international operations”*, Hans Henrik Schultz, Program Manager, Danish Defence Material Command.

#### **ABOUT CORENA**

CORENA is a global technical publications company with subsidiaries and representation in 10 countries. We have more than 15 years experience with technical documentation and information systems. CORENA's technical publication systems are widely used, primarily by customers within the Aerospace and Defence industry. CORENA's systems and industry knowledge in structured content have been essential to longstanding business relationships with companies who publish, manage and use structured XML/SGML based content to enhance their business. CORENA's major strength is the ability to transform domain and business knowledge into structured XML/SGML content and deploy it to a long-term 'company-efficient' industrial solution. Among our customers you will find Bombardier Aerospace, Saab Aerotech, EADS, Boeing, Volvo Aero, SAS, Singapore Airlines, Kongsberg D&A, Thales, and the Norwegian, Finnish, and Danish Defence.
