

## BAE Systems chooses CORENA

A CORENA PRESS RELEASE

### FOR IMMEDIATE RELEASE

Örebro, Sweden - 8 May 2009

### CORENA signs contract with BAE Systems

CORENA announced today that they have signed a contract with BAE Systems in Sweden.

The contract includes a range of CORENA products spanning from integration with LSAR (Logistics Support Analysis Record), through the Life\*S1000D Common Source Data Base, and Life\*IPC (Intelligent Parts Control) to the resulting Life\*IETM (Interactive Electronic Technical Publication builder and viewer). Furthermore the CORENA solution will integrate with engineering and support systems at BAE Systems. The contract also includes conversion and migration of existing legacy data into Life\*S1000D.

“Heavily supported by our newly established Swedish office, this contract is a result of CORENA’s offensive focus on the S1000D technical publication market. Our relationship with BAE Systems is very important to CORENA and is expected to expand further over the next years”, says Toralf Johannessen, CEO, CORENA.

“After having performed a thorough analysis of possible vendors to support us in the future, we selected CORENA based on their proven track record and demonstrated competence to improve our ILS processes. Also CORENA’s well-known customer care and flexibility has been an important factor to us”, says Anders Jonsson, IT Manager, BAE Systems.

#### ABOUT CORENA

CORENA is a global software development company with subsidiaries and representation in 10 countries. CORENA is one of the world’s foremost suppliers of Commercial-Off-The-Shelf products managing the production, publishing, distribution, and use of technical documentation for complex equipment. CORENA’s products are widely used, primarily by customers within the Aerospace and Defence industry utilizing recognized international standards like ATA iSpec 2200 and ASD/AIA S1000D. CORENA’s systems and industry knowledge have been essential to longstanding business relationships with companies, who publish, manage and use structured, XML/SGML based, content to enhance their business.

*FH77 BW L52 – ARCHER from BAE Systems. The first project that will run in CORENA’s S1000D solution.*
