

CORENA establishes partnership with Cortona3D

CORENA PRESS RELEASE

Birkerød, Denmark. 15 June 2010

CORENA establishes partnership with Cortona3D

CORENA has now established a partnership with Cortona3D, which allows our joint customers to take advantage of the technologies of the two companies.

Cortona3D provides 3D driven technical authoring software to streamline the authoring of technical communications. Cortona3D software delivers advanced tools that provide manufacturers with the ability to deliver more efficient and effective technical documentation – parts catalogs, technical manuals, operating procedures, assembly instructions and training and eLearning materials.

As a result of this partnership CORENA will manage the Cortona3D generated content in its CORENA S1000D CSDB and would publish the content coming both from Cortona3D and from other authoring sources such as an XML editor into advanced IETPs.

The benefits of the partnership for users include:

- standards compliance to S1000D
- reduced risk of inconsistent or out-of-date technical documentation
- shortened length and complexity of the publications cycle
- a common platform for effectively integrating otherwise isolated information assets

Prior to the announcement several joint customers have shown interest in this combined offering.

ABOUT Cortona3D

Cortona3D open standards authoring tools produce materials based on 3D CAD and engineering data, providing subject matter experts the power to create interactive, animated product documentation accurately, rapidly, and efficiently without re-work. Proven benefits are three times faster production, 60+% cost savings, and improved documentation quality. The Cortona3D family of tools are proven in use on projects run by Boeing, GE, Airbus and The European Space Agency amongst many others.

ABOUT CORENA

CORENA is a global software development company with subsidiaries and representation in 10 countries. CORENA is one of the world's foremost suppliers of Commercial-Off-The-Shelf products managing the production, publishing, distribution, and use of technical documentation for complex equipment. CORENA's products are widely used, primarily by customers within the Aerospace and Defence industry utilizing recognized international standards like ATA iSpec 2200 and ASD/AIA S1000D.
