

CORENA releases CORENA S1000D Version 5.8

CORENA PRESS RELEASE

FOR IMMEDIATE RELEASE

Kongsberg, 20 October 2010

CORENA today announced the commercial availability of its CORENA S1000D Version 5.8, one month after the CSDB software was pre-released into production at selected customer sites.

“CORENA S1000D Version 5.8 provides a number of new features that improve quality, productivity and ease of use for our customers. This release further strengthens CORENA’s position as the best of breed software for managing mission-critical S1000D documentation and providing robust production capabilities” says Toralf Johannessen, President and CEO, CORENA.

Some of the new capabilities included in CORENA S1000D Version 5.8 are:

- Publishing support for Issue 4.0 (Publications Module Content Editor and Delivery Suite)
- A live-linking Generic Pool feature that supports the S1000D Issue 4.0 TIR (Technical Information Repository) and makes it easy to insert pool entries and validate them on check-in
- Hotspot extraction when CGMs are inserted into the authoring tool (includes hotspot referencing and auto ID numbering on figure, graphic and hotspot)
- Web application for import of S1000D Transfer Packages, including validation and import reports
- WebServices API that facilitates Change Requests and Generic Pool/ TIR integration with external applications such as SAP, enabling them to retrieve or post objects to the CSDB
- Support for Multiple ICNs (Information Control Numbers) in IPD Data Modules
- IBM WebSphere version 7.0 (preferred) and 6.1 support in addition to Oracle WebLogic Server 10.3. (Note that the Application Servers and CORENA PAGE are supported on both Windows and Linux operating systems)
- Synchronization with LDAP - Sun ONE
- Other significant performance and usability improvements

CORENA S1000D is used to create, manage, interchange and deliver information based on the processes and data format prescribed by the S1000D specification.
