

CORENA delivers S1000D solution to Thales

A CORENA PRESS RELEASE

FOR IMMEDIATE RELEASE

Kongsberg, Norway - 27 March 2007

CORENA NORGE AS announce today that they have entered a contract with Thales Norway AS (Thales), one of Norway's leading technology development communities, for delivery of a new generation Technical Publications System. The new system will make Thales fully compliant with the governing military S1000D standard for Technical Publications.

Thales' new Technical Publications System builds on CORENA's world-class Commercial-Off-The-Shelf (COTS) product, Life*S1000D.

The completeness of the CORENA solution will make Thales able to define new projects, manage and monitor the projects, control the authoring processes, and manage the publishing and distribution of Technical Publications to different media and formats.

*"The use of international standards in the interchange of technical information between partners and customers has become a vital success factor within our industry. As a consequence we see an increasing demand for S1000D based Technical Publications in new projects. The basic concept of the S1000D standard makes it a very cost effective choice for any provider of Technical Publications. Thales made this choice years ago, and now, through the introduction of CORENA's Life*S1000D CSDB management system, we will be able to fully utilize the benefits of the standard",* says Svein Jahr, Manager Customer Support & Training, Thales Norway AS.

*"We are very proud to sign this contract with Thales. Having used the S1000D standard for some time already, Thales is well prepared for taking their documentation processes into yet a higher level of automation through the purchase of our Life*S1000D CSDB Management System. Thales' selection of our system is yet another recognition of our product's market appeal and its importance to the industry",* says Toralf Johannesen, Managing Director CORENA Norge AS.

ABOUT CORENA

CORENA is a global technical publications company with subsidiaries and representation in 10 countries. We have more than 15 years experience with technical documentation and information systems. CORENA's technical publication systems are widely used, primarily by customers within the Aerospace and Defence industry. CORENA's systems and industry knowledge in structured content have been essential to longstanding business relationships with companies who publish, manage and use structured XML/SGML based content to enhance their business. CORENA's major strength is the ability to transform domain and business knowledge into structured XML/SGML content and deploy it to a long-term 'company-efficient' industrial solution. Among our customers you will find Bombardier Aerospace, Saab Aerotech, EADS, Boeing, Volvo Aero, SAS, Singapore Airlines, Kongsberg D&A, Thales, and the Norwegian, Finnish, and Danish Defence.
